## CAREER OBJECTIVE

Looking for a position where I can implement my acquired knowledge and learn new technologies in software development

## SKILLS

**Languages:** Java, SQL, Python, JavaScript, HTML, C++, C.

## PROJECTS

### Boolean Algebra and Code Conversion using C

This C-based project offers number system conversion, BCD-Gray and ASCII conversion, Hamming code encryption/decryption, Boolean algebra functions (truth table generation and equation simplification), and a user history section.

### University Information Finding System using Java

The primary objective of this project is to establish a comprehensive platform that serves as an invaluable resource for prospective university students. This platform will offer a wealth of information, including university profiles, study guides for various countries, rankings based on criteria like teaching quality and academic reputation, the ability to search for universities by desired courses, insight into study and living costs in different countries.

### My project 3

Lorem ipsum dolor sit amet, consectetur adipiscing elit. Ut purus elit, vestibulum ut, placerat ac, adipiscing vitae, felis. Curabitur dictum gravida mauris.

## EDUCATION

02/2019 - Present **Mawlana Bhashani Science and Technology University**  
BSc(Engg.) in CSE CGPA:3.476 out of 4

## ACHIEVEMENTS

**1st position in Junior IDPC19A organized by Mawlana Bhashani Science and Technology University**

**2nd position in Junior IDPC19B organized by Mawlana Bhashani Science and Technology University**

## ONLINE PROBLEM SOLVING

### Codeforces
